SESSION 1

Friday, 24 September, 11am

KATHLEEN TURNER

'Songs of grit and gumption;' sharing the creative process of developing an album.

In this presentation, I will critically reflect on the process of developing my first album, 'Like a Lion.' The songs explore agency and vulnerability, and this album marks a celebration of women – "the muscle of the pride." The music was only one part of my bigger ambition for 'Like a Lion', with plans to weave the threads of my academic and performative roles together.

WAYNE JORDAN

Essays, Memoir and Ceremonies

This presentation will introduce Wayne's experience at DAMU, the work he created through research with objects and materials there and the ways in which this training has affected his work as he returns to his practice in Dublin.

LISA MCLOUGHLIN

Space for non-consensus.

This presentation will discuss how Arts Practice can be used as a robust and agile tool for allowing space for non-consensus. I will discuss this through the lens of two distinct but inter-related arts works that included over 300 people. These works sought to explore both autonomy and dependency in society from all who participated in the projects, including myself as an artist.

DANNY MCCARTHY

The (Re)Search Goes On Forever

In this presentation I will talk about my work as an artist and how research can even be valuable many years after it has been completed. This will be illustrated with projects using the same research and over twenty years between them. I will be addressing this with regard to my visual art and sound art practice, where the research feeds into the work rather than creating the work.

BRIAN FAY

A Porous Relationship: art practice and research

This presentation looks at the relationship between formal and informal research and how it relates to drawing practices. Using examples from contemporary drawing practices this presentation proposes that this relationship is dialogical rather than one of distinction and that both enterprises may be understood as having a porous dynamic.

TRÍONA NÍ SHÍOCHÁIN

Experiential Orality and Theorisation in Song

Oral creative practice constitutes complex socially embedded and embodied artistic knowledges that often lie beyond the inherent limits of written text. Through an exploration of the symbiosis between creative practice and scholarship, this paper considers how the experiential orality of traditional song can generate new theoretical insights that live beyond the page.
